

Manual Antenna Positioner MAP 1.5-100kg-T

Technical Data

Antenna height adjustable manually	1.0 m to 1.5 m
Height adjustment by crank handle	
Load capability	max. 100 kg
Polarisation manually	0°/90° (vert./hor.)
Tilt angle manual adjustable	+/- 30°
Moveable with 4 casters	
Material	Plastic + reinforced fibreglass
Temperature range	+10 °C...+35 °C

Brief description

The Manual Antenna Positioner **MAP1.5-100kg-T** is specifically designed for measurements in electromagnetic absorption chambers at a fixed measuring height of the E-field generators.

Polarisation change is performed manually from 0° to 90°. The height is manually adjustable by a crank handle from 1.0 to 1.5 m. The field generator can be tilted by +/- 30°.

The E-field generator rotates during polarisation around their axis to eliminate any elevation errors.

Information presented enclosed is subject to change as product enhancements are made regularly. Pictures included are for illustration purposes only and do not represent all possible configurations.
